Comment re Microsoft settlement: Its about time to get this resolved. The government has been vindictive and unreasonable in dealing with this company that has done so much to facilitate our country's businesses. Without microsoft our economy would be much less efficient. Lets give some credit to this incredible company and let them get on with business. I am from Iowa and I don't think that our attorney general serves the people in the position he takes. The settlement is reasonable. Lets get on to the next generation of software and technology and stop the bureacratic intereferece with a free economy and business innovation. Stan Munger
